

# Delaware COVID-19 Testing

## Testing Framework

The State of Delaware [significantly expanded](#) its COVID-19 testing program.

As part of the expanded program, the State provides partner organizations with testing supplies to more effectively reach Delawareans where they need and can easily access tests. Partners include Delaware's hospital systems, primary care physicians, Federally Qualified Health Centers, pharmacies, long-term care facilities, and community partners. [Learn more about Delaware's Testing Framework.](#)

Testing will be prioritized for:

- Any symptomatic individual.
- Anyone with known exposure to COVID-19.
- [All long-term care residents and staff.](#)
- Vulnerable Delaware populations, including elderly Delawareans and members of low-income communities.
- Certain front-line essential workers.

## Symptoms

*Discuss with your doctor if you have elevated temperature, cough, difficulty with breathing, or muscle aches.*

### Things to know

Individuals who have symptoms should stay at home. Many

individuals infected with COVID-19 recover by resting, drinking plenty of liquids and taking pain and fever-reducing medications. It's important to be aware of your symptoms and take precautions. In some cases, illness can be severe and require hospitalization.

If you have a medical emergency, call 911 and make sure to let the dispatcher know which symptoms you are experiencing.

## **If you may have been exposed but don't have symptoms**

- No need to go to the emergency room (ER); it's important to preserve ER resources and avoid exposing vulnerable people to the virus.
  - Stay home and make sure to distance yourself from vulnerable populations.
  - Monitor your symptoms to see if anything changes.
- 

## **Testing Locations**

\* Some hospital testing sites require that individuals obtain an order or prescription from a health care provider for testing. Teleconsultation is preferred. (\*Bayhealth, Beebe and ChristianaCare can pre-screen patients via phone without needing to see a provider).

**If you don't have a doctor:** Call 2-1-1, or text your ZIP code to 898-211 for individuals who are deaf and hard of hearing, and you will be connected to medical personnel about screening.

Select a county ▼	Submit

## **Beebe – Sussex**

### **Date and Time:**

Thursday, June 18, 2020

8:00 am - 4:00 pm

### **Location:**

Beebe: Various sites

Call Beebe's Coronavirus Screening Line, at 302-645-3200 for location information

Lewes, DE

## **BEEBE CORONAVIRUS SCREENING LINE AND TESTING**

If someone is in need of an assessment, **call Beebe's Coronavirus Screening and Assessment Line, at 302-645-3200.** The caller will be screened and assessed for possible COVID-19 testing or another appropriate level of care. If the caller needs testing, the provider will place an order that can be used at one of the Referral-Based Testing sites once an appointment is scheduled. The line will be staffed seven days a week from 8 a.m. to 4 p.m. If a caller has a provider order, the line will assist with scheduling the patient at one of the Beebe Testing sites.

## **COVID-19 SCREENING, TESTING, & TREATMENT AT BEEBE**

Beebe Healthcare is proud to offer screening for COVID-19, which involves a series of questions about your current health, and testing for COVID-19, which is a nasal or oral swab, at designation Beebe locations. In some cases, COVID-19

tests are sent out to other labs for processing; in other cases, they are processed at Beebe's Clinical Lab at the Margaret H. Rollins Lewes Campus. Beebe is partnering with the Blood Bank of Delmarva on using donated plasma from those who had COVID-19 to help treat those who are currently hospitalized with COVID-19.

Beebe opened a COVID Positive Care Center in Georgetown so patients diagnosed with COVID-19 who do not need to be hospitalized can receive face-to-face care, including provider visits, lab, imaging, and more. Interpreter services are available.

### **I FEEL I NEED TESTING, WHAT SHOULD I DO?**

1. Reach out to your provider.
2. If you do not have a provider, call 302-645-3200 to be screened and assessed by a Beebe provider.
3. If the provider deems a test necessary, Beebe will reach out to you to schedule a visit and instructions will be provided.

### **Bayhealth – Dover**

#### **Date and Time:**

Thursday, June 18, 2020

8:15 am - 6:00 pm

#### **Location:**

Bayhealth Dover area sites

Various sites; call for location information 302-310-8477.

Dover, DE

As the coronavirus continues to spread, [Bayhealth is holding referral-based drive-thru screenings](#).

[En Espanol.](#)

[Kreyòl Ayisyen.](#)

Bayhealth has set it up this way to help save community members from the inconvenience of attending a drive-thru and being turned away if they aren't eligible to be screened.

If you have symptoms, such as fever, cough or shortness of breath, call the Bayhealth hotline at 302-310-8477, Monday – Friday from 8:15 a.m. to 6 p.m. and Saturday – Sunday from 10 a.m. to 2 p.m. During the call you will be pre-screened by a physician, nurse or advanced practice provider. If you meet the criteria, you will be directed to a screening location. You may also contact them at [coronavirus@bayhealth.org](mailto:coronavirus@bayhealth.org).

It is strongly recommended that you do not go to your doctor's office or emergency department without calling first, since many can isolate at home without being evaluated in person. As always, if you are experiencing a medical emergency, call 911.

## What is the difference between “quarantine” and “isolation”?

Both quarantine and isolation help protect the public by preventing exposure to people who have or may have a contagious disease.

- **Quarantine:** separates and restricts the movement of people who were exposed to a contagious disease to wait and see if they are infected and become sick.
- **Isolation:** separates sick people with a contagious disease from people who are not sick.

[Download the “Quarantine versus Isolation” Flyer](#)

# Additional Resources

You can also view [CDC Testing Information](#) here to help you determine if you or someone you know should be tested, how to get tested and what to do after you have been tested.

Keep in mind, this is only guidance as decisions about testing are at the discretion of state and local health departments and/or individual clinicians.
